HP 2211x
21.5-inch LED Backlit LCD Monitor

The perfect combination of screen performance, sleek design, and responsible features.

Enjoy Extra Benefits

The HP 2211x 21.5-inch diagonal monitor with LED (Light Emitting Diode) backlighting delivers an eye-catching view of your work. An LED backlit panel also delivers an array of benefits over CCFL (cold cathode fluorescent lamp) backlit panels, which include:

- LEDs don't contain mercury, eliminating the cause for concern over the use of the element
- LEDs are small, solid state components, so the monitor is not only thin and light, but it is more robust than previous CCFL monitors
- LEDs can create deeper blacks for a high dynamic contrast ratio
- LEDs have quicker on/off switching times than CCFL panels
