## Xperia™ neo V – Catch more than the moment

---

Love brilliance? Awake people's feelings. Share emotions. Shoot everything in HD with Xperia™ neo V. Then show it all. In true colours on the Reality Display with Mobile BRAVIA® Engine. Or in full-screen, full size, full colour. On your HD TV via HDMI. Want to really show off? Make that beautiful scenery come to life on your TV in stunning 3D\*.

### Chat with your mates. On video

Time to walk the talk. For real. Xperia™ neo V has a front facing camera. And with Google Talk™ inside, you can see what your mates are up to on the video call. Or sweep the music festival with your phone so they feel like they're there with you. Prefer Skype™\*\* or another video chat service? Download it from Android Market™\*\*\* and chat away with your mates face-to-face.

### Facebook lives inside Xperia™.

#### Sharing your entertainment doesn't get any faster

Add zoom to your social life. Use Facebook inside Xperia™ to see, share, like and comment on tracks and photos straight from your music player or gallery. Why not share and recommend the apps you like, and like the music you love directly from FM radio. Or check out what your friends like and recommend on Facebook™ with the Music & Videos app.

### The fun starts here

With Xperia™ neo V you can enjoy the whole world of Android™. More than 200,000 apps for you to choose from – and share it if you want. All this. And so much more. From a smart, sharp phone that fits so beautifully in your hand.

\* 3D TV is needed to show 3D panorama.

\*\* Skype™ for Android is available for free from Android market.

\*\*\* Applications from the Android Market™ vary widely in size, from less than 100 KB for small utilities to 3-4 MB for full games, music player applications, or other major offerings. The average size, if a representative selection of useful and fun applications is selected, is about 1 MB. This means that, on average, more than 100 applications can be downloaded and used on your device without negatively impacting performance. With the ready availability of the Android Market™ application in the phone, it is also very easy to delete and later reinstall infrequently used applications.

## Sony Ericsson signature features

---

Xperia™ neo V comes with a range of Sony Ericsson features as standard. Below is a summary of the key signature features.

### Sony Ericsson Timescape™

#### The place to meet your friends

The Timescape™ application manages all your communication with one person in one place. You can effortlessly browse by category your Facebook™\*, Twitter™\*, email and text communications, as well as view your photos. Now everything is all together and in chronological order, so you don't have to open different applications to see what's going on.

### Sony Ericsson infinite button

#### Everything you want from everywhere

Tap the infinite button in the Timescape™ application and smart filter each category of communication by person. For example, when viewing a text message from a friend in Timescape™, tap the infinite button to view a list of all chat messages with that friend.

### Sony Ericsson Sync

#### Your mobile life on the web

Synchronise your phone data using Sony Ericsson Sync so that you always have a backup. While you're at it, match your phone contacts with your Facebook™ contacts. All your synchronised phone data is right at your fingertips and in your account on [www.sonyericsson.com](http://www.sonyericsson.com).

### Sony Ericsson Local connectivity

#### More control over your media

Using Sony Ericsson Local connectivity, you can exercise more control over how media files get transferred and stored. For example, you can select MTP mode to transfer files if you want to limit the risk of data corruption or select MSC mode if you want to have more control over the data storage.

### Sony Ericsson Home screen application

#### The place you call Home

Customise your Home screen with widgets, shortcuts, folders, themes, wallpaper and other items. Where's best for you? Email top right? Music player bottom left? You decide. With four extensions to your Home screen, you've got plenty of space to put things where you want. Just remember to flick left or right to find them.

\* This service is not available in all markets.

## Positioning – location based services

---

Supported standards:

- OMA Secure User Plane Location (SUPL) v1.0
- 3GPP™ Control Plane location (incl. Emergency location)
- Qualcomm® GPSTOneXtra™

Supported satellite systems:

GPS

GLONASS\*

*\* **NOTE:** GPS and GLONASS are used together to calculate the position. With both systems active, the accuracy and robustness of the positioning is better in most conditions. The usage of GLONASS as an additional system is transparent both to users and developers, and the benefits are automatically available to applications currently using the Satellite Positioning API (“GPS Provider” in Android terminology).*
