Duke is the new Caberg flip up which is 100% MADE IN ITALY with a captivating look and innovative technical solutions.

Duke is the result of the acquired experience of Caberg who was the first Italian company to produce flip up helmets.

The new **Duke** comes with the dual homologation P/J which allows you to ride with the chin guard open guarantying safety thanks to the lever P/J on the left hand side of the helmet. This lever when in the "J" position, blocks the chin guard in the fully open position avoiding the chin guard to accidentally close. Thanks to the reduced dimensions of the helmet, the weight of the new **Duke** is only 1550 gr +/- 50gr.

The **Duke** is equipped with the exclusive Double Visor Tech system that, thanks to the easy to use inner sunvisor, allows you to ride always with the right light and in safety. The inner sun visor is treated anti scratch , while the outer clear visor is not only antiscratch but also antifog thanks to the double lens Pinlock. Ventilation is guaranteed by two easy to use vents, one positioned on the chin guard and one on top of the shell. The air is channelled through grooves on the inner liner that ensures perfect ventilation of the helmet. The lining is completely removable and washable, realized with breathable and hypoallergenic fabric for maximum freshness, with reflective inserts at the back of the neck.

Duke is also offered in a sportive version "LEGEND" black and white stripes, matt black and yellow fluo stripes, Matt black and orange stripes, white with Italian flag colors stripes and the version HI VIZION yellow fluo.

The **Duke** has the seating to accommodate the Caberg Bluetooth communication system "JUST SPEAK EASY" which allows to communicate not only with your own mobile phone and your passenger but also to connect to a GPS system, listen to music through your mobile or an MP3 player. Just Speak Easy is equipped with Bluetooth A2DP that permits to listen in high quality stereo.
