INNOVATION

DESIGN

FUNCTION

QUALITY

Our outdoor products have been inspiring camping enthusiasts and fans of the outdoors for generations. The Enders name has traditionally stood for lasting reliability, ease of use, wide-ranging functionality and versatility in everyday use, while offering excellent value for money.

Our customers' wish to combine maximum comfort in their leisure time with maximum environmental friendliness provide the motivation behind our continuous improvement of our products and of the thought we put into adding to our product ranges. Our long-term guarantees, courteous service and capacity to deliver have made Enders the strong and reliable partner that it is now in the sector.

OLAF BAUMEISTER

Every barbecue needs someone to light the first flame. And at Enders that person is Olaf Baumeister – from two points of view. The famous TV cook is not just our culinary source of ideas and ambassador for our brand, but he also advises us on new developments for our barbecue devices. The goal is to make sure that everyone ready to follow a couple of easy tips in food preparation is able to produce marvellous delicacies using their Enders barbecue.

And Olaf has certainly achieved that! It doesn't matter if the topic is the best possible connection to your gas cylinder how best to clean the barbecue basin after the party's over – every Enders barbecue is built to ensure your culinary success.

If you would like to know, for example, how to produce the perfect steak, take a look at the pages to follow.

GAS BARBECUES PP. 14 - 61 CHARCOAL BARBECUES PP. 84 - 93

From basic models to premium class barbecues – the Enders barbecue range has the right model for everyone. Immaculately designed barbecues using proven technology await you. Check them out.

PATIO HEATERS PP. 62 - 83

Outdoor living – for Enders, an outdoor lifestyle isn't just for the summer! Our patio heaters provide the cosy warmth you need even when the weather is cool. Our ECO technology produces the minimum environmental impact and the lowest possible energy consumption.

CAMPING EQUIPMENT PP. 94 - 113

In this chapter you will find a wide range of cooking and camping equipment, with the accessories to match. Discover interesting new products, such as the Explorer camping barbecue, which can do all your barbecuing, boiling and baking.

ALUMINIUM BOXES PP. 114 - 120

These boxes are real all-rounders: Aluminium boxes by Enders are tough, rigid and easy to transport. They are ideal for use in camping, adventure travel and expeditions.

INNOVATIVE IDEAS FOR TOP OUTDOOR COMFORT

JUST FLIP IT ONCE FOR THE PERFECT STEAK!

At last: a gas barbecue that enables you to produce perfect, juicy steaks every time – thanks to the **TURBO ZONE**. Because a good steak needs to be seared for a short time at extremely high temperature for the meat to develop its delicious barbecue flavour. The **TURBO ZONE** is very easy to use: just turn it on and you're ready to sear your steaks almost immediately.

- **Can be regulate with complete freedom** – immediate adjustment from the lowest to the highest temperatures. Just turn the red knob, TURBO ZONE responds immediately
- **The highest temperatures** give the meat its classic aroma, leaving it substantially juicier and tastier
- **Economical:** The TURBO ZONE uses no more gas than conventional gas barbecue surfaces
- It allows you to barbecue using **a number of different heat zones** for the perfect results, whatever meat you are preparing
- Easily recognisable visibly glowing **flame cover giving off a red glow**

CLEANING IN A FLASH

SIMPLE CLEAN is the innovative solution by Enders for cleaning your gas barbecue simply and easily – all you need is a pair of hand grips.

- The **fire bowl and grease trays** have entirely smooth surfaces – with no nooks and crannies – and can be **removed without any need for tools**

- All parts are made of stainless steel, which makes them **dishwasher-safe**
- The SIMPLE CLEAN system by Enders (patent pending) makes even the most awkward cleaning job simple
- in addition to the **Kansas series** there are now several models in the **Monroe series** now available fitted with SIMPLE CLEAN

The four stainless steel inserts can be removed individually, making them easy to clean

Two grease trays can also be removed without any fuss

All removable parts can be cleaned conveniently in the dishwasher

QUICK & EASY FIRE LIGHTING WITH NO LONG WAIT

Using the Enders **QUICKFIRE SYSTEM** lighting your charcoal barbecue is child's play. All you need is a little newspaper and a match for your charcoal to start glowing within 15 minutes – without using unhealthy and dangerous barbecue fire-lighting fluid!

- **Fast:** the charcoal will begin to glow within 15 minutes (using the chimney effect)
- **clean:** No need for unhealthy and dangerous barbecue fire-lighting fluid
- **easy:** All you need is a little newspaper and a match

1. Place some newspaper in the opening
2. Add charcoal onto the covering grate
3. Insert a lighted match into the Quickfire system
4. The charcoal will be glowing within 15 min.

GENTLE ON NATURE AND ON YOUR POCKETBOOK

Using the 6-kW Enders **ECO GREEN BURNER** you can get the same amount of radiated heat as you get with a conventional 12-kW patio radiant gas burner. By using the environmentally friendly

6-kW burner you will reduce your gas consumption, and thus your operating cost drastically – by up to 50%. This means lower costs and reduced emissions.

■ Innovative and high-performance

Despite lower gas consumption and the associated lower costs you get the same power to produce heat*

■ Environmentally friendly

Reduces CO₂ emissions substantially. By using the 6-kW burner you can reduce CO₂ emissions by up to 50%*

■ Economical

Up to 50% less energy consumption*

By using the environmentally friendly 6-kW burner you will reduce your gas consumption, and your operating costs drastically – by up to 50%

* = as compared to a conventional 12kW burner

COOKING AT LOW TEMPERATURES

EXPLORING DIFFERENT TEMPERATURES

JUICY, TASTY BARBECUED MEATS USING LOW-TEMPERATURE METHODS.

There's hardly a subject discussed more hotly around the barbecue than the right cooking times and temperatures. Though we used to be convinced that fast searing was the always the way, many barbecue gourmets have now the opposite view, and first gently cook their foods, only searing it later at the end of the cooking process.

The use of more gentle temperatures at the beginning of the barbecuing process means that meat will lose substantially less of its juices and will remain tender for longer. Because the temperature difference at the start of the barbecuing process between the cold meat and the hot barbecue is pretty substantial.

FLAVOUR NEEDS PATIENCE.

First temper you grill to a nice warm 80 to 100 °C with the barbecue's cover on. This ensures a uniform warm and humid atmosphere in which meat will not dry out, so that it can sweat in its own juices. But in the process, trust the temperature gauge rather than having to look for yourself. The all-too-common habit of opening the lid risks reducing the temperature to below the critical 80 °C.

SEARING THE MEAT TO GIVE IT THAT CRISPY BROWN FINISH IS THE FINAL STEP.

What you now need to do is no problem for any fan of barbecued food: nothing at all! Simply set the table, prepare the side salads and keep an eye on the temperature. This is best achieved by using a meat thermometer. But leave the meat to cook undisturbed. Once your cooking time has elapsed, then turn the **TURBO ZONE** back up to its highest setting. This is when you give the meat not just its crisp brown finish but also the seasonings of your choice, quickly and keeping a careful eye on how the meat is doing. Then simply get it to the table. A roast done at low temperature can be carved immediately, with no need for any resting time.

TO SUM UP A GLIMPSE OVER THE EDGE OF THE PLATE.

Low-temperature cooking is a method that allows even inexperienced barbecuers conjure up tasty and juicy morsels with ease.

The method is suitable for

- Delicate meats like fillet steak or roast beef
- Pieces with lots of connective tissue such as knuckle of veal
- Poultry and fish

Because the same applies to all such meats: hardly any juice is lost in the cooking process. On top of that, the method is healthier, as the gentle cooking process removes less vitamin content from the meat. And it's simply delicious.

Low-temperature cooking is surely high on Olaf's list of favourite tips and tricks. The method involves cooking the meat at a low temperature and then using the **TURBO ZONE** at high temperature at the end of the process to give it its typical aromatic barbecue finish. Try it once and use it again and again!

True juicy success depends on three factors:

- **FIRSTLY** the **thermometer** and the **viewing window** in the barbecue hood, which you need to keep a constant check on the temperature and on meat as it cooks.
- **SECONDLY** the **TURBO ZONE**, which you use to give your gently cooked, still juicy meat that final finish that barbecue fans worldwide know and love.
- **And THIRDLY:** You! Because even with its high quality and cutting edge technology your Enders barbecue is not a robot:

it's still a traditional barbecue on whose grill you can allow your creative juices flow and with which you can share your tasty ideas with your guests.

By the way – another tip from Olaf – use quality products from your local region wherever possible for really sustainable barbecued enjoyment.

As Olaf is in demand all over the place and is therefore a frequent traveller, our two compact mobile barbecues, Explorer and Urban, could be designed especially for him. Both devices can be stowed easily in a car boot and brought along wherever you drive.

You can see how to make ambitious meals even with these small barbecue devices in our recipe section: www.enders-germany.com/de/mein-bbq

A collage of three images. The left image shows a man in a white V-neck shirt grilling a burger on a black gas grill. The middle image shows a woman with blonde hair, wearing a white top and floral leggings, sitting on a wicker chair and holding a glass of beer. The right image shows a man in a blue shirt sitting on a wicker chair. The text "OUTDOOR DINING" is overlaid on the collage.

OUTDOOR DINING

THE SAN DIEGO SERIES TOTAL COMFORT IN THE BEGINNERS' CATEGORY

Generous barbecuing and storage surfaces taking up a minimum amount of space: that's our starter model, the **San Diego**. As well as the large storage shelf on the stable frame, the two side pieces provide additional space. The San Diego series also comes with a chrome-plated warming rack for your barbecued food. The enamelled barbecue rack ensures perfect barbecue results and makes cleaning child's play.

The matt black design makes the 2 or 3-flame gas barbecue a time-less feature on your balcony or patio.

new
2017

SAN DIEGO 2

- **Sturdy lacquered barbecue hood** with **built-in thermometer**
- **Enamelled barbecue rack** (in two sections) for even heat distribution and easy cleaning
- **Free-floating chrome warming rack** provides yet another place to stack your barbecued morsels (32 x 14.5 cm)
- **2 continuously adjustable cast iron burners** for powerful direct and indirect barbecuing
- **Stainless steel flame covers** protect the burner and optimise heat distribution
- **Battery-free piezo-ignition in the control button** ensures safe and reliable flame ignition
- **2 sturdy side elements** provide even more space
- **Storage shelf underneath** (48 x 36,5 cm) with fabric front screen
- **2 outdoor wheels** for easy relocation

SAN DIEGO 3

The following properties differ from the **SAN DIEGO 2**:

- + **3 continuously adjustable cast iron burners** for powerful direct and indirect barbecuing
- + **The storage surfaces underneath** (53.5 x 35 cm) provide even more space
- + **Sturdy handles in stainless steel**

OUR TIP

PRACTICAL ACCESSORIES

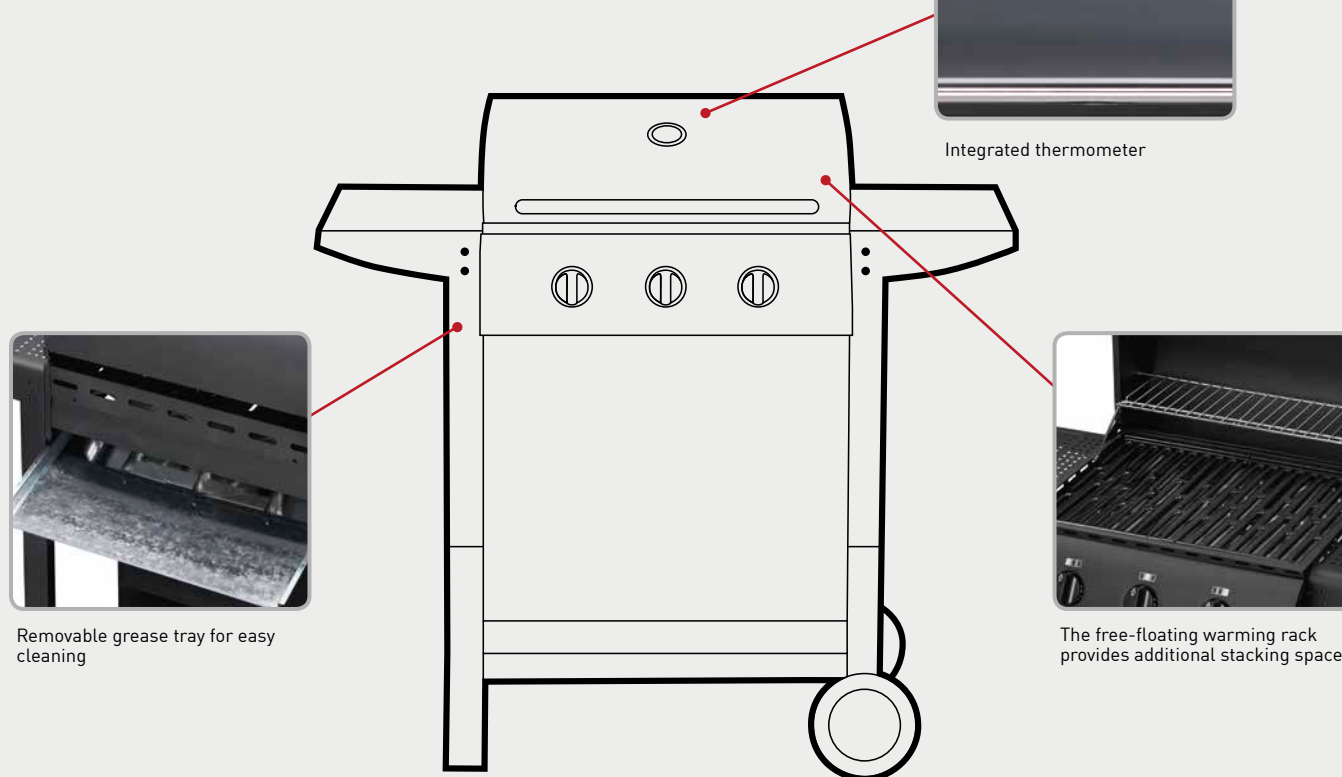

The new **kebab spit set** is delivered with six flat skewers and a two-piece frame. The practical stainless steel frame prevents your food from being laid directly on the barbecue rack, which means that your barbecued food stays juicy and does not dry out.

This preparation method is particularly suitable for vegetable dishes, as such foods are easy to burn and prone to producing unappetising bitter substances. It is also very practical, as both frame components can be used independently and can be stored very space-efficiently. ■ Art. no. 8802

THE OAKLAND SERIES COMPACT, EASY-TO-HANDLE OUTDOOR COOKING

This solid, compact and stylish series of gas barbecues, with its tough stainless steel hood, will give you the best possible barbecue results. The series has a version available with a viewing window and has been extended to include a two-flame barbecue. Its four wheels make it easy to move around on your patio or balcony. The **Oakland series** provides all the comfort of an outdoor kitchen, with its generous work surface and space-saving fold-down side shelves.

OAKLAND 2

- **sturdy, double-walled stainless steel hood** with **built-in thermometer**
- **Enamelled barbecue rack** (in two sections) for even heat distribution and easy cleaning
- **Enamelled warming rack** provides yet another place to set aside your barbecued morsels
- **2 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing
- **Stainless steel flame covers** protect the burner and optimise heat distribution
- **Battery-free piezo-ignition in the control button** ensures safe and reliable flame ignition
- The **5-kg gas cylinder** can be stowed in the container easily and safely
- **2 sturdy fold-down side elements** make for easy, space-saving storage
- **Removable grease tray** for quick and easy cleaning
- **5 utensil hooks** provide enough space for your barbecue utensils
- **2 outdoor wheels** and **2 casters** for easy relocation

OAKLAND 3 S

The following properties differ from the **OAKLAND 2**:

- + **Sturdy stainless steel hood with thermometer and viewing window (S)** for an unrestricted view of your barbecuing morsels
- + **Enamelled barbecue rack** (in three sections) for even heat distribution and easy cleaning
- + **3 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing

TIP ON ACCESSORIES

CAST IRON GRIDDLE

Create complete menus using your griddle, taking advantage of all the benefits of cast iron. Perfectly even heat distribution means perfect results, making the Oakland gas barbecue your perfect partner for cooking outdoors.

Fried eggs, chunky vegetables, fish fillets or prawns – using the Enders cast iron griddle your barbecue food is always done to a turn. Use the flat side for fish and poultry. The ridges covering half the other side will give your meat a top-class branding.

THE MONROE SERIES FOR THE DEMANDING FREQUENT BARBECUER

Experience this modern design and many functions of this top-of-the-range barbecue for yourself. Made of high-quality materials processed with careful attention to detail and boasting impressive properties, the **Monroe** is the ideal barbecue for advanced barbecue artists.

The series stands out for its unmistakable Enders TURBO ZONE system and a wide range of features; most recently the Enders SIMPLE CLEAN system. The stove can also be controlled via the main control panel – ensuring greater barbecuing comfort .

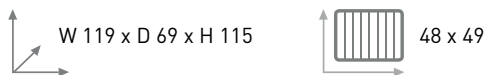

TO THE VIDEO

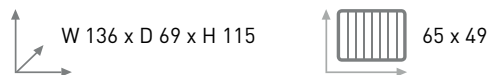

MONROE 2 S TURBO

- **new** equipped with **SIMPLE CLEAN**
- **TURBO ZONE:** The intense heat you need to sear your steaks perfectly
- **Large stainless steel hood** with **built-in thermometer**
- **Viewing window (S)** for an unrestricted view of your barbecued food
- **Enamelled barbecue rack** (in two sections) for even heat distribution and easy cleaning
- **Stainless steel warming rack** provides yet another place to stack your barbecued morsels
- **2 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing
- **Stainless steel flame covers** protect the burner and optimise heat distribution
- **Battery-free piezo-ignition in the control button** ensures safe and reliable flame ignition
- **Removable grease tray** for easy cleaning
- **5-kg gas cylinder** can be stowed in the container
- **2 sturdy fold-down side pieces**
- **1 double-walled door** in high-quality stainless steel
- **5 practical hooks** for barbecue utensils
- **2 outdoor wheels** and **2 casters** for easy relocation

MONROE 3 SIK TURBO

The following properties differ from the **MONROE 2 S**:

- ✚ High-performance **infra-red burner (I)**
- ✚ **Stove (K)** built into side shelf
- ✚ **Enamelled barbecue rack** (in three sections) for even heat distribution and easy cleaning
- ✚ **3 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing
- ✚ **2 double-walled doors** in high-quality stainless steel
- ✚ **1 sturdy fold-down side element** makes for easy, space-saving storage

THE CLEVER CLEANING SYSTEM

- Both the entire fire box and the grease-tray can be removed without the need for tools
- each part is made from stainless steel and are dishwasher-proof

You can find further information on SIMPLE CLEAN on page 8.

The SIMPLE CLEAN function is not included in the Monroe 5 KP Turbo

MONROE 4 IK TURBO

The following properties differ from the **MONROE 2 S**:

- + High-performance **infra-red burner (I)**
- + **Stove (K)** built into side shelf
- + **Large, double-walled, stainless steel hood** with **built-in thermometer**
- + **Enamelled barbecue rack** (in three sections) for even heat distribution and easy cleaning
- + **4 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing on four separate barbecue zones
- + **2 double-walled doors** in high-quality stainless steel
- + **1 sturdy fold-down side element** makes for easy, space-saving storage

**ONE TURN OF A
BUTTON FOR
THE PERFECT STEAK!**

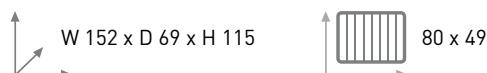

TO THE VIDEO

- Just turn it up full to sear your steaks at the highest possible temperature
 - Turn up the direct heat on the completely controllable barbecue zones for perfect steaks
 - Its consumption is just as economical as conventional barbecue zones
- You can find further information on the TURBO ZONE on page 8.

MONROE 5 KP TURBO

- equipped with **2 Turbo zones**
- **Large, double-walled, stainless steel hood** with **built-in thermometer**
- **Giant cast iron plate (P)** and **high-quality stainless steel rack** for a unique and multi-faceted barbecue experience
- **Stove (K)** built into side shelf
- **Stainless steel warming rack** provides yet another place to stack your barbecued morsels
- **5 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing on five separate barbecue zones
- **Stainless steel flame covers** protect the burner and optimise heat distribution
- **Battery-free piezo-ignition in the control button** ensures safe and reliable flame ignition
- **Removable grease tray** for easy cleaning
- **5-kg gas cylinder** can be stowed in the container
- **1 sturdy fold-down side element** makes for easy, space-saving storage

FROM A COMPACT POWER PACKAGE TO OUR OUTDOOR BARBECUE KITCHEN

Whether you are looking for a stainless steel gas barbecue with high-quality wood applications or a plancha, whether you want work with or without a barbecue hood – Enders can provide you with your own individual barbecue. Choose the Enders Urban, for example, for use at home and on the go. Its compact dimensions and attractive design allow Enders to provide you with suitable models not only for use on the balcony or patio, but also for a spontaneous barbecue picnic.

URBAN MOBILE GAS BARBECUE

The barbecue that knows its territory by name: This model is made for the urban environment. Because the novelty of this compact barbecue is that it's not just able to barbecue, boil and bake in a single device, but also combines attractive design with intelligent technology including the options of operating using a gas cylinder or screw-in canister. This flexibility allows you to use this table-top device at every barbecue. It doesn't matter whether it's on the balcony, on your patio or in the park!

TO THE VIDEO

W 94 x D 42 x H 34

48 x 32

- **The thermometer in the hood** helps you barbecue with precision
- **2 separately adjustable stainless steel burners** (2 x 2.2 kW) for direct and indirect barbecuing and baking
- **Solid, enamelled cast iron rack** (2/2) with integrated flame covers
- **Steady, chromed and removable pan grid** for safe cooking and easy cleaning
- **Robust body** in long-lasting and lightweight cast aluminium
- **Battery-free piezo-ignition** ensures safe and reliable flame ignition
- **2 removable grease trays** for quick and easy cleaning
- **Sturdy side tables** give you space to lay down your barbecued food and utensils – **easy plug-in assembly**
- **Robust plastic frame** with transport grips for good on-site safety and modern looks
- Can be operated with **gas cylinders or screw-in canisters** (the necessary tubing and regulator are included)

The **Brooklyn** gas barbecue impresses with its attractive and compact design. Its rounded edges and the large surface available for barbecuing and stowing food as well as the thermometer integrated into its hood are among the other product features that mark this Enders barbecue apart. Due to its modest dimensions, the Brooklyn is also suitable for use on small balconies and in modest patio areas.

The new **Chicago 3** gas barbecue always lets you take that step in the right direction: outdoors. Three powerful stainless steel burners for direct and indirect barbecuing provide precisely the mouthwatering barbecued delicacies your guests are waiting for. The steady, foldable side pieces make your barbecuing work easier, while the removable grease tray makes disposal of cooking fats a child's play. The discreet lower cabinet in which the gas cylinder is stowed makes the Chicago 3 a tasty looker too.

A man in a red t-shirt and dark shorts is grilling food on a stainless steel gas barbecue. He is holding tongs and looking at the grill. In the background, three people are sitting on a patio, enjoying the outdoor setting. The patio is surrounded by lush greenery and a modern building. The barbecue has a large stainless steel hood and four control knobs. A side burner is also visible on the right side of the unit.

Get out of the poky kitchen and out into the green: The **Boston 3 K** gas barbecue is a sturdy outdoor kitchen, complete with a stove function. Under the large stainless steel hood there are three stainless steel burners to fire up your barbecue passions. Because the optional cast iron rack or plate will inspire any passionate barbecuer to create brand new ideas, which can even involve barbecuing well outside the firebox. Because gas barbecuing is infectious.

The **Florida Plancha** is equipped with a solid plancha made of high-quality stainless steel. This can be used to cook any fresh produce in direct contact with the steel at very high temperatures (300 – 350°C). The barbecue's unique heating ability sears your produce sharply, so that meat and vegetables cook faster while keeping their juices and remaining firm and tasty. You can prepare fish, meat, vegetables and even fruit for your guests on the Florida Plancha.

- **Back-friendly worktop height** of 81 cm
- **2 outdoor wheels** for easy relocation

OUR TIP

FOR BARBECUING ON THE PLANCHA

Thanks to its sealed surface the high-quality stainless steel griddle opens up new possibilities in food preparation as compared to a conventional rack barbecue, since with a plancha you can work with lots of sauces and marinade, as well as experimenting with de-glazing your foods.

The great benefit of the plancha is its easy cleaning. After you have enjoyed your barbecuing, you can simply scrape off the residue using the plancha's spatula into the collection tray at the front of the plancha. The collection tray can be removed by picking it up by its handle. When the griddle is cool you should just rub it down briefly with a damp cloth.

You can find a product comparison for all **individual models** on page 52.

HIGH-VOLUME BARBECUING WITH MAXIMUM COMFORT

Design meets function. This roaster is fitted with extra-powerful professional burners specially designed for barbecuing on a large scale. It can handle 50 German sausages at the same with no problem, whether it is being used by a catering firm or for a private party.

Enders roasters, made of high-quality stainless steel, provide an excellent level of operating safety year in year out. The roasting pan in sheet steel is particularly tough, making it particularly suitable for use with fritters, fried potatoes or shish kebabs.

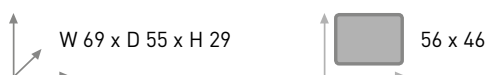

GASTRO 2 GR

- **2 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing
- A huge, **removable grease tray** for quick and easy cleaning and for extra-long periods in action
- **Stainless steel flame covers** protect the burner and optimise heat distribution
- **Battery-free piezo-ignition in the control button** means lighting the flame is safe and reliable
- **Thermoelectric flame failure safety device** for maximum safety

GASTRO 3 EM

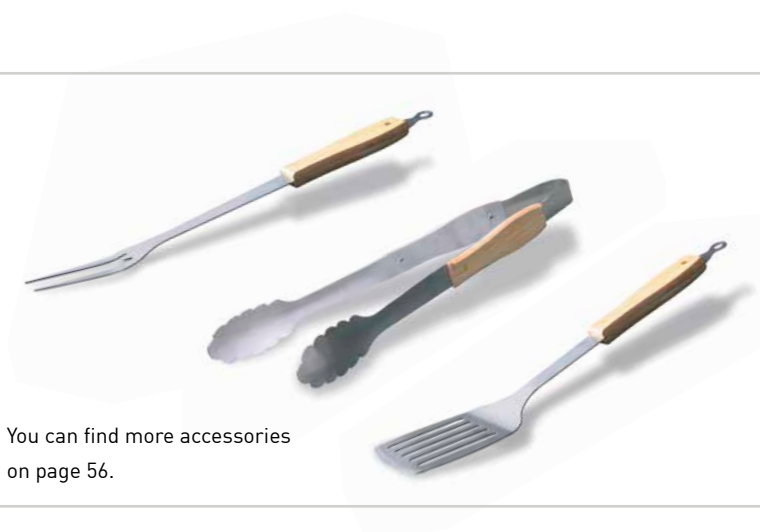

- **3 continuously adjustable stainless steel burners** for powerful direct and indirect barbecuing
- **enamelled roasting pan** makes cleaning easier later on
- **Battery-free piezo-ignition in the control button** means lighting the flame is safe and reliable
- **Thermoelectric flame failure safety device** for maximum safety

OUR TIP

PRACTICAL ACCESSORIES

Use our practical barbecue utensils to turn your barbecued food over. Our utensils are made from a combination of high-quality materials including stainless steel bamboo, and are extremely well designed for ease of use.

You can find more accessories on page 56.

STRETCH OUT THE DAY

Relaxing outdoors needn't be only a summer pleasure. An Enders patio heater means you can start enjoying the benefits of the summer in the spring and can extend the outdoor season well into the wintertime. Powered by gas or electricity, Enders outdoor heaters let you enjoy to the full the lovely spring and autumn evenings, long after the warmth of the day has begun to fade. Even in summer the cosy warmth provided by your patio heater can help you enjoy your evenings to the full.

Sophisticated patio heating technology can make your garden or café into a cosy corner for you and your guests. Our Eco Edition is a particular highlight in our range. It's easy on the environment and on your pocket. Continuous targeted research and development in reflective gas heaters has succeeded in saving precious resources. The innovative Enders Eco-Ultra technology (EEU) emits ensures heat is emitted in an extremely targeted manner and efficient outdoor burners have reduced consumption without affecting heat output.

Clean-lined elegance, technical excellence and user-friendliness: made of gleaming polished stainless steel, the **Elegance** patio heater enchants with its unique slimline look, without for a moment hiding its excellent heating performance. Its 8 kW Enders ECO-PLUS (EEP) burner technology emits the same amount of heat as a conventional 12-kW patio heater. This means that it consumes 30% less gas and emits 30 % less CO₂. Its excellent build quality, sophisticated EEP technology and easy operation add to the heater's refined elegance.

ELEGANCE

GAS PATIO HEATER

DIMENSIONS: H 218, Ø 76

- **EEP technology** for economical consumption and optimised heat radiation
- **30% less CO₂ emissions** than for conventional 12-kW burners
- **Burns for 30 % longer** than conventional burners (19 - 50 hours of operation using a single 11-kg gas cylinder)
- **Gas reflector burner** in **stainless steel** alloy for long-lasting quality
- **3.5 – 8 kW** continuously adjustable heating level controls
- **76-cm standard Enders reflector** with advanced heat radiation system
- **Thermoelectric flame failure safety device** and **anti-tipping system** for maximum safety
- The **11 kg gas cylinder** can be stowed safely and space-efficiently
- The device's **slimline sleeve** is particularly stable
- The **covered hatch and handles** ensure easy operation
- **Tough set of outdoor wheels** for easy movement from place to place

11 kg gas cylinder can be stowed

Glass table available as optional accessory

*

8 KW

ECO BURNER

This patio heater's 8 kW heat emission rating makes it a real power gas radiation heater. In no time at all it will provide you with cosy warmth and drive off any thought of colder days. Its eco-friendly properties are particularly worth noting: its 8 kW eco-burners emit the same amount of heat as a conventional 12 kW patio radiant gas burner. This means lower costs and reduced emissions.

TRENDSTYLE

GAS PATIO HEATER

Trendstyle is the name of a radiant patio heater which, despite its modest, understated design, has every reason to be self-confident. Even the high-quality fabric that elegantly covers the device's gas cylinder underlines its uncomplicated, smooth-lined appearance. Its feet, made of high-quality treated steel, which ensure its absolute stability, are also fitted with rollers to make it easy to move it from place to place.

Pedestal can be retracted telescopically

EVENT GAS PATIO HEATER

The **Event**'s timelessly beautiful design is guaranteed to turn heads at every outdoor venue. Just as remarkable is its heating power and efficient consumption. It has an unbeatable advantage at every event: Once the gas cylinder has been removed, the pedestal can be released in a couple of easy steps and sunk down into the holder shell. This saves lots of space and makes transporting the radiant gas heater child's play!

DIMENSIONS: H 220, Ø 76

- **Enders ECO GREEN technology** for even more economical consumption through optimised heat emission (registered a utility model)
- **50 % lower CO₂ emissions** than conventional 12 kW-burners
- **50 % longer operating times** than with conventional burners (25 - 40 hours of operation using a single 11 kg gas cylinder)
- **Gas heat emitting burner** in **stainless steel** alloy
- **4 – 6 kW** continuously adjustable heating level controls
- **Specially designed retraction mechanism** to quickly and easily lower the pedestal
- **76 cm Enders standard reflector** with advanced heat reflector system
- **Thermoelectric flame failure safety device** and **anti-tipping system** for maximum safety
- **Padded transport grips** make moving the device around painless
- The **11 kg gas cylinder** can be stowed safely and space-efficiently
- **Body in timeless design** in durable materials
- **Tough set of outdoor wheels** for easy movement from place to place

Can be retracted telescopically down to 155 cm

The gas cylinder can be stowed in the lower cabinet

6 KW

ECO GREEN

Using the 6 kW Enders ECO GREEN BURNER you can get the same amount of radiated heat as you get with a conventional 12 kW patio radiant gas burner. Its eco-friendly properties are particularly worth noting: the fact that it uses a 6 kW eco-burner brings down CO₂ emissions by up to 50 %*. By using the environmentally friendly 6 kW burner you will reduced your gas consumption, and thus your operating cost drastically – by up to 50 %*. This means lower costs and reduced emissions.

* = as compared to a conventional 12kW burner

* On the cover flap you can find a detailed explanation of the pictogram and the terminology used.

POLO 2.0

GAS PATIO HEATER

Integrated transport grip

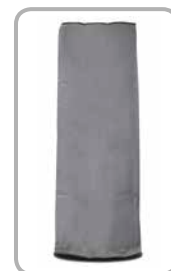

Tough draw-bail lock

Fully adjustable reflector

The slimline yet eminently stable Enders **Polo 2.0** gas heater emits a pleasant, gentle heat. In contrast to conventional mushroom-shaped heaters, this compact little heater can deliver its heat precisely at sitting height. This performance feature is due to its intelligent ENDUR reflector system, which redirects infra-red heat radiation widely and highly efficiently. The innovative technology behind the system has been registered for protection.

Weatherproof cover
Art. no. 5660

DIMENSIONS: H 115, Ø 42

- **Gas heat-emitting burner** in **stainless steel** alloy for long-lasting quality, using the Enders ENDUR reflector system
- **The reflector insulates the device** and also works to redirect radiated heat back inwards
- **3 – 6 kW** continuously adjustable heating level controls
- **25 – 50 hours** of operation using a single 11-kg cylinder
- **Stable, slimline body** in brushed **stainless steel**
- **Thermoelectric flame failure safety device** and **anti-tipping system** for maximum safety
- **Operating controls well protected** inside the protective body
- **Integrated height-adjustable reflector** for accurate alignment and individually adjustable heat shields on the rear side
- The **11 kg gas cylinder** can be stowed safely and space-efficiently
- **Stand** made of treated steel with **additional transport grip** makes it easy to handle and move from place to place
- The **tough draw-bail latch** ensures easy opening and closing
- **Tough, firmly fixed outdoor wheels** for easy movement from place to place

ECOLINE PURE

GAS PATIO HEATER

The evening is stretching out before you. Because the new **Ecoline Pure** shines not just in terms of its top-quality materials, but also in terms of performance. Its two independently operating burners, together with their 11 kg gas cylinder, can provide 36–76 hours of well-directed outdoor heat, while its high-quality design provides radiant beauty. It invites you to linger, keeping the atmosphere warm and inviting.

The gas cylinder can be stowed in the lower cabinet

Weatherproof cover
Art. no. 5667

DIMENSIONS: H 213 x W 42 x D 45

- **New, modern design** using a mix of aluminium alloy and protectively coated steel
- **The directable heat emission over a 90-degree angle** is both unique and highly efficient
- **38 – 76 hours** of operation using a single 11-kg cylinder
- **2 independently operating gas head emitters (2 x 2 kW)** in **stainless steel** alloy for long-lasting quality
- **Burner system** angle can be fully adjusted for your specific needs
- **Thermoelectric flame failure safety device** and **anti-tipping system** for maximum safety
- **2 battery-free one-hand Piezo-ignition** makes lighting the appliance safe reliable
- **Slimline, design-driven body form** to look well on every patio
- **Sturdy and stable structure** ensure the appliance does not tip over
- The **11 kg gas cylinder** can be stowed safely and space-efficiently
- **Tough set of outdoor wheels** for easy movement from place to place

With the **Solid** patio heater you can spread a warm, protective glow against the cold over your balcony, garden or patio. Its clever construction and use of materials ensure that it stay standing solidly. Its body is made of brushed stainless steel or steel, and can accommodate an 11 kg gas cylinder. By the way, a particularly practical feature for its use in professional catering is its large storage area for glasses and ashtrays. In addition, its pedestal can be retracted for space-efficient storage.

COMMERCIAL

GAS PATIO HEATER

This appliance is the real professional in the field and is ideally suited as a gas patio heater for commercial usage and for demanding private users. The **Commercial** radiant gas heater is made of high-quality, brushed stainless steel and is completely rust-free and immune to damage by the weather and residues from usage.

The table on the heater is suitable for use as a dumb waiter, for everything your guests may want to leave down during an informal drinks party. Its high-power 14 kW rating will impress with the cosy warmth it can radiate, even on the coldest days. The extractable gas cylinder space allows easy and back-friendly cylinder replacement. The Commercial's retractable pedestal means space-efficient storage. One particularly important argument for its use in business is the theft-prevention lock integrated into it. The Commercial can be secure using a chain, so that it does not get moved from where you left it.

DIMENSIONS: H 230, Ø 88

- Equipped with **Turbo burner** in **stainless steel** and modern **multi-spark ignition**
- 4 – 14 kW** continuously adjustable heating level controls
- 11 – 38 hours** of operation using a single 11 kg cylinder
- 88 cm Ø Reflector** in FAL
- Thermoelectric flame failure safety device** and **anti-tipping system** for maximum safety
- The **removable gas cylinder space** for 11 kg gas cylinder is easy to handle and allows you replace your gas cylinder quickly and easily
- Retractable** patio heat emitter pedestal for space-efficient storage
- The practical storage shelf** is particularly useful for commercial applications
- Large foot stand in stainless steel** for extra stability
- Padded transport grips** make moving the device around painless
- Lockable door** for security
- Tough set of outdoor wheels** for easy movement from place to place

Weatherproof cover,

ACCESSORIES

ISOREFLECTOR Ø 88 cm

By using the Iso Reflector (which can be used with products in the Solid, Trendstyle and Commercial ranges), you can reduce the amount of heat wastefully directed upwards by your radiant heater. This will improve the performance of your patio heater. ■ Art. no. 5364

The brightly glowing flame inside the patio fireplace creates an inviting atmosphere. The fascination of the flame will provide a comfortable ambiance on your patio or in your garden. This high-quality patio fireplace is particularly robust and long-lasting. Its burner is continuously adjustable. The gas cylinder can be space-efficiently stowed inside the container reserved for it.

CHILL OUT TONIGHT

Enders infra-red radiant heaters stand out for their modern design and robust construction, adding elegance to any atmosphere. The infra-red tube gives off a pleasantly lit atmosphere as well as cosy heat as soon as it is switched on. The intense waves of warmth penetrate the air, providing energy-efficient and precise heating wherever the appliance is used – warming both the people and the objects it is directed at. The quick and easy operation of the heater is an added benefit.

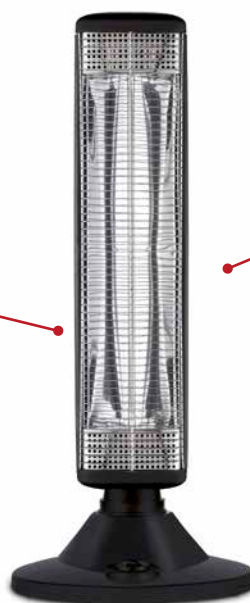

The following applies to all electric radiant heaters:

- **Protection class: I**
- **220 / 240 Volt AC**
- **Immediate warmth**, effective and precisely where it is needed
- **Energy-efficient** with no need for pre-heating
- also suitable **for well-ventilated indoor spaces**
- **Odour-free and silent**
- **High-quality**, stylish design
- **GS checked**

FLORENZ STANDING RADIATOR

Optional oscillation
function (approx. 60°)

Can be set up vertically or
horizontally

You can switch on your Florence E-radiator whenever it gets chilly. It doesn't matter whether you're on a patio, balcony or garden, or even inside in a winter garden or the bathroom – the deep comforting heat produced by the device provides the extra warmth you need. And, as an added extra, if there's a wind blowing, the electrical heat it radiates is not blown away so easily in the breeze.

DIMENSIONS: H 77.5 x W 32 x D 32

- **2 possible power settings:** 450 W and 900 W
- with **transport grip**
- with **anti-tipping system**

MADEIRA WALL-MOUNTED RADIANT HEATER

3 possible power settings:

For anyone who likes to stay out on the balcony or patio even in cooler weather, the Madeira really shines. Its three power levels, which go to a maximum of 2000 Watts, don't just provide heat quickly, but are particularly easy to operate. Because you can use the remote control to adjust the radiant heater in comfort from anywhere in its vicinity. And the heater can reach you wherever you are. Its adjustable housing can be angled quickly and easily, so that it will always be heating the right spots.

DIMENSIONS: H 10.5 x W 63 x D 8

- with **remote control and wall bracket**
- **3 power settings:**
750 W, 1,500 W and 2,000 W
- **Adjustable tilt angle**

BARBECUING THE OLD-FASHIONED WAY

Charcoal barbecues, the original barbecue, come in a number of variants, starting with a value-for-money starter model, through the tripod barbecue, to the kettle barbecue. They all have one thing in common: smoke, and the typical aroma that smoke gives to the food. Charcoal grilling is still the favourite barbecuing method.

And at Enders there is something for everyone. Fast and direct barbecuing over red-hot coals or challenging, indirect barbecue fun using our appliances, which are naturally all tested and certified for maximum safety and stability.

QUICK FIRE
SYSTEM *Enders*™

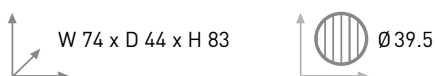

With ash catcher and ventilation regulator. The foot base is extremely stable

UTAH

OUR TIP

PRACTICAL ACCESSORIES

The charcoal starter provides quick results with its well-designed air supply. It gets your charcoal glowing in a jiffy.

- Size: 280 x 165 cm
- Art. no. 8750

Using the barbecue hand bellows, which uses a crank handle on the side to create an air current, you can light your barbecue with total ease and in double-quick time.

- Art. no. 8751

FEEL THE FREEDOM

For more than 50 years, Enders has been offering an extensive range of sophisticated and functional products, covering all aspects of the camping and outdoor living experience. Its innovative, high-quality selection of cooking and camping equipment and the matching accessories have been developed and designed to meet the growing demands of our discerning customers.

Here too you'll find new products for release in 2017, such as the handy back for the Explorer. And we can also offer you practical toilets for when you're out and about. All our chemical toilets are compact and easy to operate. We also provide the comprehensive range of accessories you need for their hygienic operation. A winner of the coveted "caravanning design award," the Deluxe camping toilet sets a new benchmark in functionality and look & feel.

EXPLORER

CAMPING BARBECUE

new Tough transport bag with grip and shoulder straps
Art. no. 2101

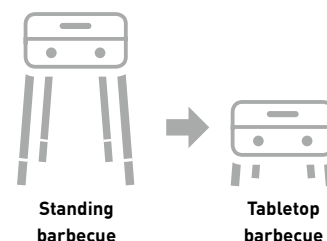

Enamelled barbecue rack with integrated flame covers

Optional extra for mobile use:
canister holder set (Art. no. 2092) and screw-in canister (Art. no. 6322)

As multifunctional as a Swiss Army Knife, the Explorer is the ideal gas barbecue for when you're out and about: it will bake your bread rolls in the morning, cook your soup at lunchtime and barbecue a perfect steak for you in the evening – using the latest barbecue technology, it combines the multifaceted benefits of a gas barbecue with the flexibility of a mobile barbecue. With it on your team, you're well equipped to follow your impulses, whether you want to stay put or head off to your local park. The Explorer can use either a gas cylinder or handy gas canisters as fuel.

STANDING BARBECUE DIMENSIONS: W 48 x D 42 x H 76
TABLE BARBECUE DIMENSIONS: W 48 x D 42 x H 34

- **The thermometer in the hood** helps you barbecue with precision
- **48 x 32 cm** provide an ample barbecuing surface
- **2 separately adjustable stainless steel burners** (2 x 2.2 kW) for direct and indirect barbecuing and baking
- **Enamelled barbecue rack (2/2) with integrated flame covers** protect the burner from grease and ensure even heat distribution
- **Robust body in long-lasting and lightweight cast aluminium**
- **Battery-free piezo-ignition** ensures safe and reliable flame ignition
- **2 removable grease trays** for quick and easy cleaning
- Ideal **worktop height of approx. 66 cm** (as standing device) – easy to use either in standing or in sitting position
- Usable as either **tabletop or free-standing device** (short and long legs both included in standard product) – simply insert the legs of the length you need
- **Excellent stability** thanks to clever legs structure
- **Transport bag** included for removable legs
- Can be operated with **gas cylinders or screw-in canisters** (the necessary tubing and regulator for usage with gas cylinder are included)

OUTDOORS DON'T DO WITHOUT ANYTHING

Make your next camping expedition as comfortable as possible with Enders camping equipment. The Culina cookware set provides the perfect solution for that peckish feeling that takes hold of you on camping evenings. Use it to prepare a small meal simply and easily. And our range of attractive camping lamps will prove to be more than useful. They will light up the dark and provide you with company at night.

FLASH LED LAMP

The Enders **Flash LED** lamp is ideally suited for camping, fishing and other outdoor activities. It recharges during the day via its integrated solar panel – but a hand crank or mains connection can also be used. It provides three light modes to give you the right type of light. The Flash also scores with its handy grip, which can also be used to hang it up.

DIMENSIONS: H 26 x Ø 11.5

- **3 practical and environmentally friendly light modes:** 7/ 13/ 20 LED
- **3 separate charging methods** – the light never goes out
- **With practical handle** for easy carrying
- **Robust plastic body**

Battery recharge time:

- **Via solar charging:** approx. 9 hours for fully charged battery
- **Using mains connection:** 2 hrs. for fully charged battery

- **By cranking:** 1 min. cranking – approx. 5 min. of light

Illumination duration:

- **Using 7 LEDs** lighting period* of – approx. 5 hrs.
- **Using 13 LEDs** lighting period* of – approx. 4 hrs.
- **Using 20 LEDs** lighting period* of – approx. 2.5 hrs.

*starting with fully charged battery.

WATER CANISTER

COLLAPSIBLE

- Robust carry grip
- Up to 15 l by volume
- With lockable faucet

Does your camp equipment not include an integrated water tank or do you need a mobile water canister for when refills are not available? This fold-down, transparent plastic water canister takes up practically no space in storage and can be used immediately when required. Naturally, it is made of food-safe materials and has a robust carry grip for easy transport. It is also fitted with a lockable outlet faucet to dispense its 15-litre capacity of water with ease.

COMFORT

MOBILE WC

Piston pump produces high pressure to remove waste residues during flushing

When filling, the fresh water and waste water tanks do not have to be kept apart from each other

Filling the waste water tank is simple and easy

The transparent screw cap shows you the fill level

The Enders **Comfort** and **Deluxe** camping WCs are uniquely easy to operate. These chemical toilets are manufactured in a high-quality injection-moulding process, and the development team placed the utmost importance on comfort in their design. The resulting product features place Enders mobile toilets at the top of the pile in relation to all other popular toilets on the market. The **Deluxe** offers so much elegance and innovation that it received the "caravaning design award 2010." Thanks to their extremely smooth surface made of hygienic plastic, Enders Mobile WCs are extremely easy to care for. Thanks to their sturdy construction, Enders mobile WCs can support the weight of users weighing up to 130 kg.

DIMENSIONS: W 38.5 x D 45.5 x H 34.5

A close-up photograph of a white, curved surface, likely part of a piece of equipment. In the foreground, the word "Enders" is embossed in a stylized, cursive font, followed by a registered trademark symbol (®). The background is out of focus, showing a black and green handle of a machine, possibly a lawnmower or a similar outdoor power tool, with a white frame.

Enders®

AN ALL-ROUNDER THAT NEVER TAKES A BREAK

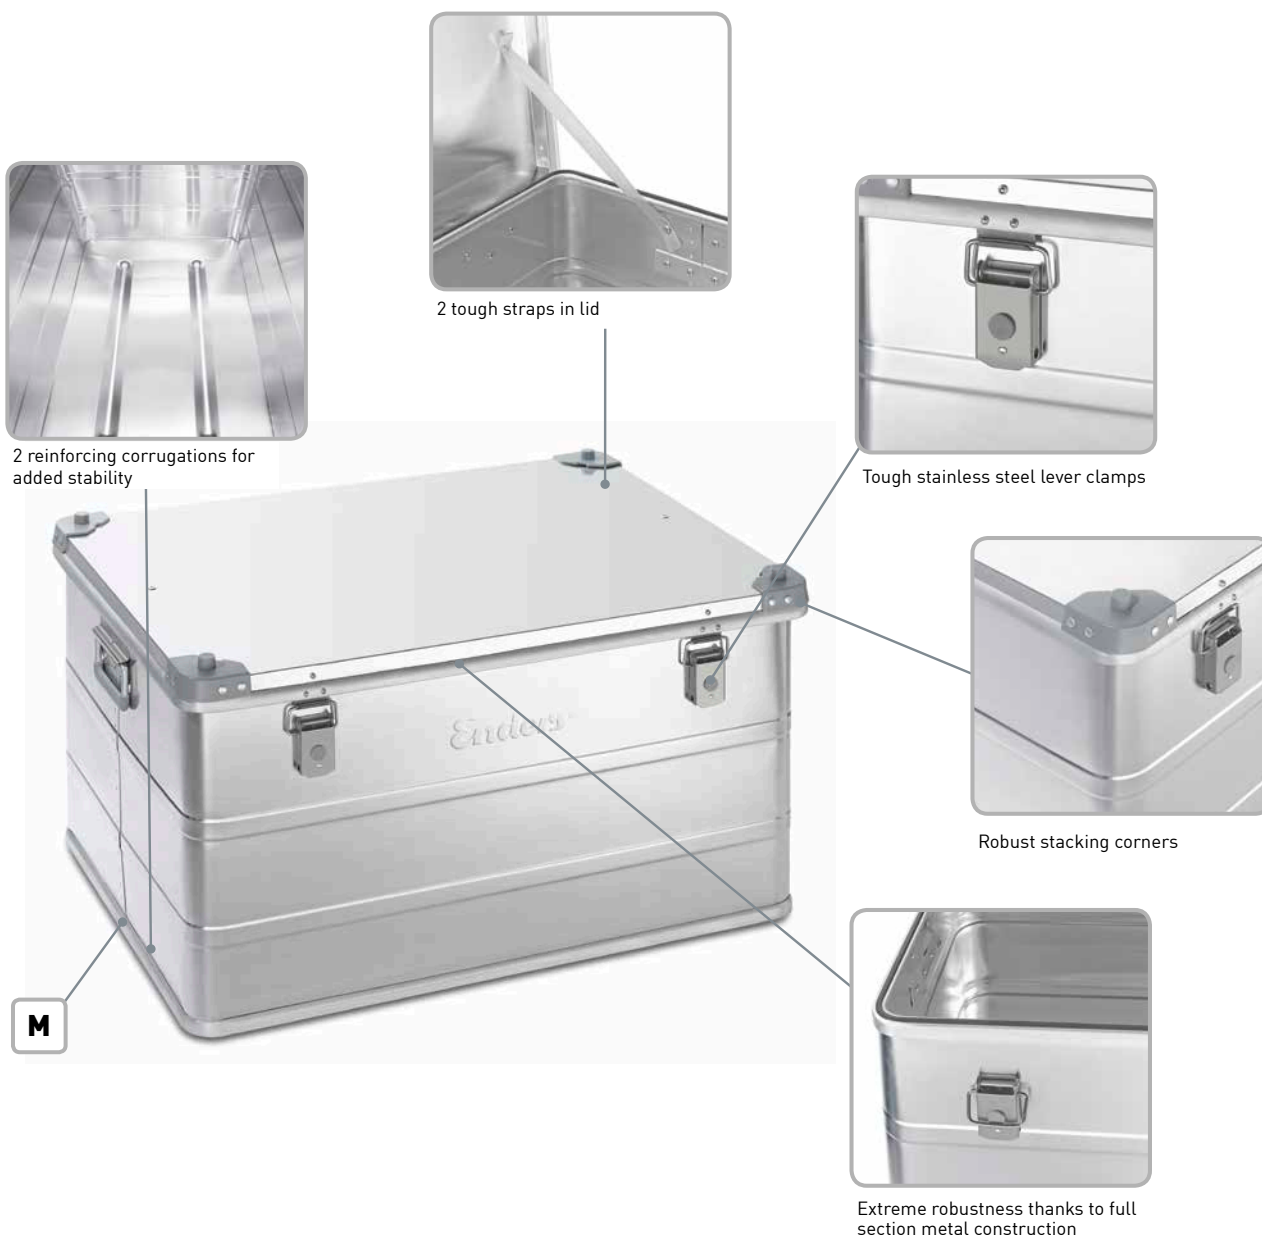

A real all-rounder with unbeatable benefits. The aluminium box and aluminium crate have an ever-growing fan base among both professional and private users. Among the reasons for are the excellent properties of aluminium as a material. The metal is light and tough, meaning that any aluminium crate or box can deal with even the most extreme temperatures. And aluminium does not rust – an aluminium box is therefore the perfect choice for expeditions and voyages of adventure, as a helper on camping trips or for storing valuable tools. In addition to all this, there could hardly be a more hygienic transport container than an aluminium box.

VANCOUVER

INDUSTRY PRO BOXES

The Enders **Vancouver** Industry Pro box is available in 123, 170 and 236-litre versions. This universal box for transport and storage stands out both for its robust construction to guarantee a long service life and for its extremely heavy stacking and load-carrying

capacity. Its sturdy and firm stacking corners and full-section edge, base and lid sections give the box its unique structural stability. The box's floor has two reinforcing corrugations, which give the box yet more rigidity and dimensional stability.

- **Tough, sturdy Industry Pro Box** in 1-mm Aluminium plate
- The **Lid, walls and floor plates are in full section**, providing a high level of stability
- **All round rubber seal** provides protection against dust and water splashing
- **Its tough stacking corners in grey plastic** can deal easily with extreme loads
- **Two reinforcing corrugations in the box floor** give the box extra rigidity and dimensional stability
- **Stainless steel hinges and plastic coated spring-loaded handles** for easy transport
- **Two extremely tough straps** hold the lid open
- **Robust lever clamp seals in stainless steel** for long service life

TORONTO

CLASSIC BOX

Every single aluminium box in the Enders range, no matter how large or for what purpose, stands out for its unbeatable quality. This relates not just to the container's dimensional stability or high-precision fabrication processes, but also to its suitability for its task. There is hardly a cargo for which one of our aluminium boxes is not the ideal transport solution. Their unique quality also reveals itself in its practical transport grips in shockproof plastic. Where

their contents are not too heavy the aluminium box is very easy and comfortable to transport. The excellent stacking capability and attractive design of these crates are among the other factors that show the superiority of our products over other popular transport containers. Accessories including casters and locks complete the range of products.

Accessories: Built-in lock with key

Accessories: Built-in casters for even easier transport

- **extra-tough frame-based construction** for extra dimensional stability
- **Foam rubber seal** in lid to protect against dust and water splashes
- **2 side safety grips** for easy handling and heavy load capacity

- **Stackable** thanks to separations in the lid's frame
- **1 front grip** in plastic can be used as a suitcase handle
- **The lid** is self-latching
- **The lever clamps** can be sealed
- **Lock with key** can be added

OTTAWA

EASY BOX

Stackable inside one another

Plenty of room for all sorts of cargoes

This aluminium crate has enjoyed an ever expanding fan base over the years as aluminium is a lightweight, rigid, temperature resistant, robust, rust-free and hygienic transport material, suitable even for use with foodstuffs. Nothing beats this aluminium crate for any application, whether you need a transport crate or stackable crate for personal storage – from the **Ottawa S**, with its 30 litres of storage space, to the Ottawa XXL with a capacity of 120 litres.

- **Extra-tough frame-based structure** for extra dimensional stability
- **The wide variety of sizes** allow them to be inserted inside on another **for space-saving storage**
- **2 lateral carry grips** with padding for comfortable handling
- **Floor** set back from the ground it stands on
