Dimension | Bring the Sound of your TV to life

A DISCREET SOUNDBAR FOR PERFECT INTEGRATION

Dimension is an ultra-thin soundbar (29/16") designed for modern screens. It can easily be fitted to a wall or on a TV cabinet.

ALUMINUM CHASSIS

Thanks to the exceptional rigidity of Dimension's brushed aluminium mono bloc chassis, no vibrations will interfere with the sound.

FULLY IMMERSIVE 5.1 SURROUND SOUND

Dimension is an incredible sound bar offering high-definition multichannel digital surround sound for your Home-Cinema sessions. Thanks to Dimension's surround management system, your room's layout has little influence on the fully immersive 5.1 surround sound. Thanks to the wide soundstage of more than 4m, Dimension is ideal for large rooms (> 50m²).

INNOVATIVE ACOUSTICS

Dimension features five identical ultra-flat patented speaker drivers for optimal timbre coherence over the whole listening area, and their high efficiency provides amazing definition. Enjoy clear, natural-sounding dialogues, and discover the slightest details of your soundtracks.

PLUG & PLAY
Thanks to the HDMI™ CEC connectivity, you can synchronise Dimension with your TV, set-top box or Blu-ray/DVD player, and control the whole installation using only one remote control.

MODERN AND WIRELESS
Keeping with the times, Focal also gives you the option of connecting Dimension to a smartphone or a tablet for listening to your audio and video files thanks to various solutions (Universal Wireless Transmitter, Apple TV®, Airport Express®, Chromecast dongle®...)

A DISCREET AND INTUITIVE USER INTERFACE
Dimension features an intuitive touch screen which can be turned on in just a wave of the hand, perfect for a discreet Home Cinema installation.

ENHANCE THE BASS
If you like thrills and have large rooms, complete your installation with Dimension Sub. This additional subwoofer will provide even deeper bass (35Hz), and will increase the power handling of your installation.

Weight	12lbs (5,5kg)	31lbs (14kg)

Focal, French manufacturer and designer, is recognized as a world leader in the design and manufacturing of loudspeakers for the home, speaker drivers for the car but also monitoring speakers for recording studio and headphones.

Building on 35 years of expertise when it comes to the expectations of music and home-cinema fans in terms of sound, Focal infuses its acoustic know-how into a new sound object: the soundbar Dimension.

We were very quick to notice that most soundbars try to seduce consumers by combining a compact design with adequate sound power, even if it means forsaking clarity and neutrality of dialogues. Easy to install and use, innovative and distinctive by its acoustic design, Dimension goes further and provides flat screens with real power, excellent audio quality and a perfect integration.

TITANIC

Dimension | Bring the Sound of your TV to life

Dimension will change your home movie experience forever. It is an elegant soundbar solution that delivers a rich and enveloping performance, stylishly blending into your living space. Focal's 35 years of acoustical excellence ensures that Dimension offers punchy and detailed sound, faithfully reproducing the soundtrack to truly immerse you in the action. Discover Sound that is larger than life!
